HOUSE OF ROHL

THE STORY CRAFT TELLS

Perrin & Rowe is a member of the House of Rohl, a collection of artisan brands recognised for their artistry and heritage.

The Rohl family have spent a lifetime seeking stories of dedication, passion and craft. They have brought together diverse brands, exceptional in their category, that complement each other. Independent spirits, but shared values. A belief that quality starts with the material, design is in the detail and craftsmanship is paramount.

Distinctive stories are what makes life exceptional. At the House of Rohl, we discover time-honoured craft, revealing stories unlike any other. Stories of place and provenance. Stories of ingenuity and invention. Stories of a relentless pursuit of perfection.

THE PERRIN & ROWE STORY

Forty years ago in East London, Bob Perrin and Greg Rowe began an extraordinary partnership. Despite limited funds and a workshop that was little more than a garden shed, they began by machining brass components that others found too difficult to make. As designers they made their name by producing the world's first 3 in 1 tap – a tap that dispensed hot, cold and filtered water – using their own Triflow technology. This blend of innovation and traditional manufacturing craft defines the Perrin & Rowe brand today.

Our comprehensive range of kitchen and bathroom brassware is manufactured in our own factories in Britain. We still make taps in small batches, pouring molten brass by hand into moulds of our own design. Our sanitaryware is made in Staffordshire, the heart of English ceramic manufacture for three hundred years. By controlling every element of design and production, Perrin & Rowe has become known by architects and design professionals for its quality and durability.

Bob and Greg retired some years ago, but their legacy and passion live on at Perrin & Rowe. Now a luxury brand with an international reputation, our principles of British design and craftsmanship, advanced engineering and traditional manufacturing, remain the foundation of our success.

PROUDLY MADE

IN BRITAIN

THE PERRIN & ROWE PROMISE

All Perrin & Rowe products are designed and manufactured in Britain.

We are driven by engineering excellence. We use state of the art manufacturing technology to support our traditional methods and skills.

Our brassware is made from low lead brass of the highest quality available. The surface is plated to a thickness that exceeds industry standards, ensuring a deep, protective coating that is resistant to wear and pleasing to the eye.

We assemble our brassware by hand, and individually water-test each one.

Our handles and spouts include bearing rings and engineering 'O' seals to ensure maximum durability.

Perrin & Rowe brassware has a 'wobble free feel'.

Our ceramic disc valves are tested up to 500,000 cycles and supplied by the world's leading ceramic cartridge manufacturer. On test, valves are repeatedly turned on and off with pressurised water to the equivalent of 25 years' use in a domestic installation.

Perrin & Rowe specifically manufacture for different markets around the globe. No additional adapters or converters are required for installation.

Our aim is to offer the world's finest range of kitchen and bathroom products.

A GUIDE TO KITCHEN BRASSWARE

The choice of kitchen brassware has grown hugely since Bob Perrin and Greg Rowe established our business over 40 years ago. As the tap is the most used tool in the kitchen, it's important to make the right choice. Use our guide to ensure you consider all the possible options.

A kitchen tap can do far more than simply deliver hot and cold running water. Perrin & Rowe's best-selling range is our 3-in-1 Instant Hot taps. A small tank under the sink keeps water just below boiling point, and delivers it on demand for perfect tea and coffee, or filling saucepans with steaming water. An alternative is our Mini Instant Hot tap. This is a small, separate tap that can be placed alongside the main kitchen tap, or installed with a second sink, in an island unit for example.

Perrin & Rowe also offer Filtration taps. These work on a similar principle to our Instant Hot taps, but do not require a tank, and provide filtered water through an easily replaceable filter unit under the sink. Again, they are available as 3-in-1 taps or separate Mini taps.

In our Armstrong collection you will also find our new combined Instant Hot and Filtration Mini tap. A clever, compact, stand-alone tap that supplies both steaming hot and cold filtered water.

The other function to consider is a Rinse. This is a small, hand-held spray on a retractable hose, ideal for washing vegetables, rinsing crockery or cleaning your sink. We offer a choice of two types, either built into the kitchen spout, or mounted separately.

Kitchen taps come in a number of forms. Many designers prefer a monobloc tap for a contemporary kitchen. This has a simple body, with one or two levers, that drops into a single hole in the work surface. Traditionalists often choose pillar taps, sometimes called bibcocks. These are two identical, separately-mounted taps – one for hot water and one for cold. Bridge mixers are essentially two pillar taps joined together with a 'bridge', with a single, central spout. These need either two or three holes to install, depending on the design. Perrin & Rowe offer contemporary and traditional styles of bridge mixer.

Some Perrin & Rowe kitchen taps are available in wall-mounted form. Ideal for creating a sleek and uncluttered work surface, or where space is limited. Most of our designs are deck-mounted, intended for installation into the work surface.

To help you navigate the different formats, the design styles we offer them in and the options available, we have created an easy-to-use table on page 14 of this brochure.

BRASSWARE FINISHES

STANDARD

Perrin & Rowe brassware can be customised to suit your own personal style with eight, high quality finishes that complement a range of kitchen designs, appliances, cabinetry and fittings.

Phoenix 1914 in chrome

OUR STANDARD BRASSWARE FINISHES INCLUDE:

Chrome CP

A brilliant, silver finish with a hint of blue.

Nickel NI

A shiny finish with a golden glow.

Pewter PF

A brushed Nickel finish with a blue-grey, matte appearance.

SPECIAL

Perrin & Rowe special finishes are a range of luxurious, warm metallic hues to bring a touch of style and unique character to your kitchen.

The three brass finishes are described as 'living finishes' which means they develop a unique patina as they react with their environment.

Aquitaine 1470 in polished brass

Care & maintenance guide.

A guide to caring for each of the different finishes is available on our website: perrinandrowe.co.uk

OUR SPECIAL BRASSWARE FINISHES INCLUDE:

English bronze BZ

A metallic brown finish with subtle notes of orange and copper.

Gold IG

Plated with 24 carat gold pure yellow in colour, with a natural glow and high shine.

Polished brass BR

A warm finish with coppery undertones. Living finish.

Satin brass SB

A matte finish with strong undertones of yellow ochre. Living finish.

Aged brass AB

A darker finish with a tarnished, aged look. Living finish.

TRADITIONAL COLLECTION

LEVERS

The Traditional Collection of Perrin & Rowe kitchen mixers offer a variety of colours and finishes. Through the innovative use of materials such as Brass, Porcelain, Corian and Avonite, Perrin & Rowe has made it possible to design a tap to suit your own individual requirements.

IMPORTANT NOTE:

The colours shown are not exact representations. Please contact Corian direct for a brochure www.corian.com

Contemporary and Country mixer taps are not available with Corian or Avonite options.

SPOUTS

The Traditional range of kitchen sink mixers offer interchangeable spouts, enabling you to create a look and flow that suits you.

TRADITIONAL SPOUT OPTIONS

All mixers in this range (excluding Mayan) are available with either a Phoenician or Etruscan spout.

SINGLE FLOW SPOUTS

Single flow spouts are ideally installed in systems with equal pressures. Spouts are fitted with an aerator, providing the uniform 'Champagne style' flow as standard. Minimum recommended installation pressure = 1bar.

A flow straightener is also available on request.

BIFLOW SPOUTS

Products with biflow spouts are ideally suited to installations with differing hot and cold supply pressures, especially where the hot supply is gravity fed.

If your installation has equal pressures then you may prefer a single flow spout. All of our biflow products are available as a single flow, just prefix the product code with the letter A.

Minimum recommended installation pressure = 0.2bar.

REGULATED SPOUTS

If you have high pressures or are concerned about water consumption then you may wish to regulate the flow. All of our products are available with regulated single flow spouts – just prefix the product code with AR.

Minimum recommended installation pressure = 2bar.

Traditional collection Phoenician spout

Traditional collection Etruscan spout

RANGE SUMMARY

As we manufacture and assemble all of our taps in the UK, we're able to offer some unique variations so that you can personalise your brassware. Choose your spout shape, between a lever and crosstop handle, and customise the finish of your tap. We've created this handy guide to help you make the best choice to suit your chosen style and functional needs.

A bridge tap is a two holed tap where hot & cold water is supplied through one spout

A monobloc tap is a one holed tap where levers regulate water flow and temperature

Pillar taps are used in pairs with separate hot and cold water

Deck mounted taps are fitted to the sink or kitchen work top

Wall mounted taps are fitted above the sink, with the supply fed from the wall

A single hole connection

A two hole tap, or can be as the result of combining – the main tap monobloc, with a separate mini tap or hand held rinse

A tap that has three connections to the work top which could be a bridge tap with a pull-down rinse or a combination of different tap formations

A tap that has four connections - most likely combining a separate hand held rinse with a widespread mixer

A C-shaped spout has an umbrella handle like design and is a more common style

A U-shaped spout is slightly more square in its appearance

An elegant shaped spout, inspired by grand French châteaux

As you look through the selector you will see that there are some icons to help identify the features that our taps have. Some of these will be set, but some are available as an option. Where the feature is set, the icon will be black and where it is an option it will be grey. As you look through our brochure, these icons are placed as reminders to help you make the best choice to complement your preferences.

A Phoenician spout is C-shaped and the more regular option within our Traditional collection

The Etruscan spout is more angled than the Phoenician spout and is available as an option within our Traditional collection

A single lever is used to operate the tap

Multiple levers operate the tap – either two operate the hot and cold supply independently or there is an instant hot or filtered water function.

A more traditional cross style of tap handle

Our Traditional taps with lever handles can be customised by changing the colour or finish of the handle

Taps featuring this icon have the function of providing instant hot water. This may be either within the main tap or as an additional, miniature tap

The cold water feed can be filtered to provide separate water, free from cross contaminants. This may be either within the main tap or as an additional product

The tap has a rinse function within the main body of the tap. The rinse head “pulls out” of the main tap spout

A separate hand held rinse tap which sits away from the main tap

A separate wall mounted tap. Known as a Pot Filler, it is placed near to the stove to conveniently provide water to aid cooking

THE INSTANT HOT COLLECTION

PERRIN & ROWE®
LONDON

BEST IN THE BUSINESS

Perrin & Rowe were at the forefront of the technology behind the world's first three way tap – delivering cold, hot and filtered water. The natural progression of this technology has taken us to the innovative 3 in 1 instant hot water mixer. It features an anti-scald feature making it perfect for hot drinks, cooking, food preparation and cleaning.

Our offer comprises 3-in-1 mixers and stand alone miniature versions which compliment our full range of sink mixers. Our latest collection, The Armstrong, combines our instant hot water technology with a water filter function to offer the benefits of both instant filtered drinking water and instant hot water.

All of our instant hot taps are available in the full range of eight finishes to include our special “living brass finishes” which develop a unique patina as they react with their environment over time.

The heater tank which produces the instant hot water is compact and high quality with a state of the art digital touch screen display allowing for the water temperature to be pre-set between 75°C and 98°C.

- Innovative 3-in-1 instant hot mixer with anti-scald, perfect for hot drinks, cooking, food prep and cleaning
- A wide range of standalone dispensers or mini versions to match all of Perrin & Rowe's current sink mixer styles
- Available in all the Perrin & Rowe standard and special finishes
- Compact, high quality heater tank with state-of-the-art digital touch screen display
- Quick and simple installation using a standard 13amp socket
- 1.5KW element
- 2.4 Litre capacity tank
- Vented system
- High quality filtration system
- Backed by the Perrin & Rowe promise and competitive guarantees

The Phoenix 3-in-1 Instant Hot Tap was specified for all 190 apartments at the iconic Canaletto Tower, London.

Polaris 19375B

LATEST FILTRATION TECHNOLOGY

- Compact design
- Non-pressurised filter housing
- Easy to install with moveable fixing bracket
- New design filter housing connection for quick and easy filter replacement
- High quality cartridge with nano filtration technology removes debris, water borne cysts, bacteria, chlorine, chemicals, bad taste and odour
- Lime scale reduction to increase product lifespan
- 6 month filter life
- Complimentary reminder service for replacement cartridges

THE CARTRIDGE WITH NANO FILTRATION ENABLES THE REMOVAL OF 'NASTIES' INCLUDING WATER BORNE BACTERIA AND CYSTS

DIGITAL TOUCH SCREEN DISPLAY USES LATEST LED TECHNOLOGY, ENABLING THE USER TO SEE INSTANTLY THE STATUS OF THE UNIT

THE HOT WATER TANK AND CARTRIDGE IS COMPACT, FITTING NEATLY UNDERNEATH THE SINK, IT IS ACCESSIBLE FOR EASY SERVICING

UNIQUE FEATURES

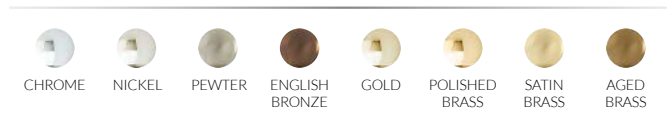

- Unique anti-scald locking mechanism on all instant hot models
- Operates from as low as 1.5 bar
- Multiple pre-set temperatures ranging from 75°C to 98°C
- State-of-the-art digital touch screen display
- Digital temperature control accurate to 0.5°C
- Rapid reheat with zero run off and spit free
- Water saving, time saving and energy efficient
- Hi-flow
- Easy to install and use
- UK manufacturer
- Available in a range of styles and finishes

- DESIGNATED INSTANT HOT WATERWAY
 - MINIMISES HEAT LOSS
- STOPS CROSS CONTAMINATION OF INSTANT HOT FILTERED WATER
 - SMOOTH FLOW
 - UNIQUE ANTI-SCALD LOCK
- NEW INNOVATIVE PUSH MECHANISM
 - EXCLUSIVE SPRING-BACK VALVE

3-IN-1

Near-boiling water, plus standard hot and cold straight from a single mixer. The 3-in-1 models include anti-scald lock technology and a dedicated hot waterway to stop cross contamination.

Aquitaine 1323CP

THE FILTRATION COLLECTION

ALL SYSTEMS FLOW

The technology behind the Perrin & Rowe filtration collection derives from the world's first three-way tap, delivering not only hot and cold water but also filtered water through a dedicated waterway – a system that ensures the filtered water is not cross-contaminated by the standard mains hot and cold water. It incorporates the highest standard Swiss-made ceramic filter which significantly reduces harmful substances such as chemical and biological contaminants as well as the most heavy metals and particles as small as 0.2 microns, while leaving beneficial minerals such as fluoride, magnesium and calcium untouched.

FOUR STAGE FILTRATION

COMPOSITION

The Ceramic filter incorporated in the Filtration system is one of the highest performing filters available in the market today and is made by Swiss manufacturer Katadyn. The cartridge is made from sintered diatomaceous earth and has a micro porous structure impregnated with silver which is known for its antibacterial action. The porous structure is able to eliminate particles down to 0.2 micron (0.0002mm) in size. One pound of carbon contains a surface area of roughly 125 acres and can absorb literally thousands of different chemicals. Activated carbon is carbon which has a slight electro-positive charge added to it, making it even more effective in eliminating chemicals and impurities. As the water passes over the positively charged carbon surface, the negative ions of the contaminants are drawn to the surface of the carbon granules.

Phoenician 1560BR

UNIQUE FOUR STAGE FILTRATION TECHNOLOGY IS RIGOROUSLY TESTED AND DEVELOPED

Diatomaceous Ceramic: Suspended matter and bacteria are retained on the ceramic surface without the use of chemicals.

Anti-Bacterial Silver: The ceramic permanently incorporates Katadyn silver that works against bacteria growth in the filter.

Carbon Block Core: Absorbs chlorine, harmful chemicals and organic contaminants that contribute to bad taste and odour.

Zeolite: Has the capability to remove heavy metals such as lead and mercury.

The filter does NOT eliminate important minerals such as magnesium, calcium and fluoride

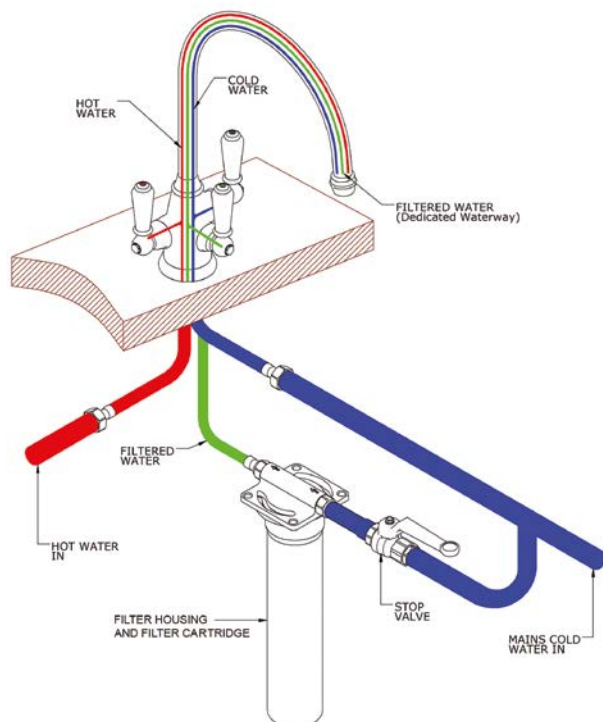

THE FILTER CARTRIDGE SIGNIFICANTLY REDUCES THE FOLLOWING SUBSTANCES:

- Odour and bad taste
- Chlorine
- Organic components such as animal and human waste
- Bacteria such as E.Coli
- Protozoan cysts such as Giardia and Cryptosporidium
- Pesticides and herbicides
- Solvents
- Benzene
- Radon
- Turbidity
- Heavy metals such as Lead

The filter has been tested by

Harvard University,
 USA Waukesha County Health,
 USA University of Basel,
 Switzerland Zurich University,
 Switzerland Ministry of Welfare,
 Argentina Pasteur Institute Lille, France
 South African Bureau of Standards Pretoria, South Africa.

LONDON

AQUITAINE

WITH PULL-DOWN RINSE

Offering an alternative to the traditional side spray rinse and freeing up precious worktop space, this monobloc sink mixer comes with a built-in retractable metal hand spray at the end of a high quality woven hose. A gentle pull releases the hand spray for use, with change of flow available at the touch of a button. After use, the hose automatically retracts into the tap body, ready to function as a normal hot and cold mixer tap.

KITCHEN ELEMENTS

PERRIN & ROWE®
LONDON

COMPLETE YOUR RANGE

Perrin & Rowe has an international reputation for the design and quality of its brassware. We take the same meticulous approach to other essential kitchen elements. Each piece is handmade by skilled artisans to adorn and enhance your kitchen.

Our stainless steel sinks embody this principle. Every sink is welded by hand to the tightest of tolerances, creating a unique 0 side radius and 9 base radius for easy cleaning. It represents an investment in quality that will pay back over many years of unblemished use.

The new must-have product for the kitchen is the Pot Filler. This fold-out tap is designed for mounting above a stove to easily fill heavy cookware. Perrin & Rowe have been making pot fillers for many years for export to North America, and we are now seeing huge growth in their popularity across Europe.

One of the delights of styling a kitchen using the Perrin & Rowe brassware collection is choosing your own finish. Chrome is classic and durable, Nickel has a warmer, champagne glow, Pewter a delicate matt. Or specify one of our special finishes – all made to order – such as Aged Brass, Polished Brass, Satin Brass, English Bronze or 24-carat Gold. Complete the look by choosing furniture handles, a soap dispenser and of course a sink waste in the same finish. Only by sourcing your brassware and accessories from the same manufacturer can you be sure of a perfect match.

Pot Filler 4799AB

STAINLESS STEEL SINKS

2671 SS 710mm

Each of our models is expertly created to our exacting specifications using premium stainless steel. All are fully insulated for heat retention and rigidity, and feature a streamlined diamond-shaped base for easy drainage. A 0-side and 9-base radius also make for easy cleaning. The result - luxuriously finished, high quality sinks that are ideal for both contemporary and classic kitchens.

Traditional rinse in Aged Brass

HAND RINSE

Clean fresh fruit, vegetables and dirty crockery sinkside and without wasting water with the addition of a stand-alone hand rinse.

Traditional hand rinse is easy to use and convenient – makes food preparation a breeze.

Available for most Perrin & Rowe kitchen taps, the hand rinse makes a tap a multi-purpose workstation. Easy to use and versatile, the rinses can be positioned to the left or the right of the sink. They have insulated handles and a flexible hose (standard length 120cm) ensuring safety and convenience. Hot, cold or mixed water is diverted to the rinse once the button is pressed. Perrin & Rowe hand rinses have been specially designed to cope with even low water pressures; the integration of a patented diverter means that they can be effective with just 1 bar (15psi) of pressure. Perrin & Rowe hand rinses are available in five different designs to complement each collection.

Please note: Rinses must not be connected directly to the mains supply of cold water and that the maximum recommended pressure is 5 bar (75psi). Taps selected with rinses will have single-flow aerated spouts.

All hand rinses are deck mounted.

ACCREDITATIONS

For your reassurance, every piece of Perrin & Rowe brassware is engineered from approved materials to exacting standards and hand-assembled within an ISO 9001:2008 accredited, quality assured environment. Recognised all over the world for its stringent, detailed standards and attention to processes ISO 9001:2008 approval is a true mark of international quality.

Perrin & Rowe believes in upholding the international standards required wherever its products are sold. Our international approvals include WRAS, KIWA UK, UPC, NSF and the Australian Watermark Standard.

All of our products are designed to comply with the requirements of the Water Supply (Water Fittings) Regulations 1999 for England and Wales, the Water Byelaws 2000, Scotland and the Water Regulations Northern Ireland.

Many have been independently tested and verified by either Kiwa UK or WRAS, to check a specific product, or for all current listed products please contact us.

Should you have any concerns or queries about your Perrin & Rowe brassware, we will be only too pleased to help. We operate a dedicated aftersales and technical advisory service, so if you have a question, just ask us.

DISCOVER

Exclusively designed and engineered to a high standard in the UK, the Perrin & Rowe Bathroom Collection is a portfolio of the finest Traditional and Contemporary bath, basin and bidet taps, showers, chinaware and accessories available today.

A preferred brand of discerning architects and designers, Perrin & Rowe Bathroom brassware has earned specification in some of the world's most luxurious hotels, resorts, spas and private residences. Most recently, these have included Sandy Lane, Barbados, the Savoy Group, London, Celtic Manor, Wales, Huka Lodge, New Zealand and Sofitel Group.

A vast range of options are available within each Perrin & Rowe Collection; items such as rainbars and body sprays can truly enhance the showering experience. Offering a personal touch, fittings are available in a range of finishes.

Beautiful bathroom brassware needs beautiful chinaware. Consistent with our heritage, the collection includes basins, bowls and lavatories which are manufactured in our own factory in the heart of the English pottery country. For more information, please visit our website.

The Hoxton basin tap from Perrin & Rowe

The Langbourn basin mixer in satin brass sits perfectly on a one hole Victorian basin.

WELCOME TO THE HOUSE OF ROHL®

The House of Rohl is a collection of artisan brands
recognised for their artistry and heritage.

RIOBEL

CONTEMPORARY BRASSWARE

Quebec is where European culture meets North American spirit. In this vibrant city, Riobel design distinctive and innovative brassware, inspired by the sculptural forms of contemporary architecture. Beneath the surface, industry-leading engineering delivers performance and reliability. Riobel offers luxury designed to be lived with.

SHAWS

FIRECLAY SINKS

The genius of founder Arthur Shaw was to identify the waste material extracted from the colliery at Darwen, as fireclay. In 1897 he established Shaws of Darwen to make use of it.

Today, at the same factory in Northern England, Shaws' own Heavy Duty Fireclay is fired hotter and longer to produce kitchen and bathroom sinks with an incredibly durable finish.

VICTORIA + ALBERT

BATHS AND BASINS

To make beautiful baths and basins of the highest quality, Victoria + Albert developed their own unique material. Made from natural Volcanic Limestone™, QUARRYCAST™ is light, warm to the touch and incredibly strong. This gives Victoria + Albert's designers the freedom to create award-winning designs that can last a lifetime.
